

Bed Bugs

This is for the treatment of bed bugs inside a building.

Possible chemical(s) to be used and time to stay out of the building

- Pro 110 ULV (4 hours)
- Dragnet FT EC (4 hours)
- Seclira WSG (4 hours)
- Temprid SC (6 hours)
- Aprehend (2 hours)

Preparations before treatment

- Furniture needs to be moved away from the wall about 2-3 inches
- All bedding needs to be completely removed down to the bare mattress
- All bedding needs to be washed twice and dried before treatment and kept in sealed bags

General information

Bed bugs can be extremely hard to get rid of. Reason why is their survivability and adaptability. They can survive up to 6 months without feeding. They can squish their already small body even smaller to fit in any crack and crevice in your house.
