

Cockroaches

This is for the treatment of cockroaches.

Possible chemical(s) to be used and time to stay out of the building

- Pro 110 ULV (4 hours)
- Dagnet FT EC (4 hours)
- Seclira WSG (4 hours)
- Seclira Cockroach Bait (no time)
- MaxForce Impact Cockroach Bait (no time)

Preparations before treatment

- All furniture needs to be moved away from the walls 2-3 inches only during spray treatments
- All cupboards in the kitchen need to be emptied out only during spray treatments
- No prep for bait treatments

General information

Cockroaches are not typical here. They do not survive outside in our temperature. The number one thing to get rid of cockroaches is sanitation. Reducing food left out. Removing clutter. Everything is food for cockroaches.
