

Gopher (Prairie Dogs)

This is for the treatment of gophers (Prairie Dogs).

Possible chemical(s) to be used for treatment

- Rozol RTU

Preparations before treatment

- Cutting the grass before is better to maximize the treatment

General information

Gophers like to be in fields. Sometimes they get pushed out and end up in your yard. They are extremely damaging to your yard because of the size of their tunnels that they dig. They can have 2-3 litters per year. They hibernate during the winter.
