

## **Spiders**

This is for the treatment of spiders.

### **Possible chemical(s) to be used and time to stay out of the building**

- Pro 110 ULV (4 hours )
- Dragnet FT EC (4 hours inside, 2 hours outside)

### **Preparations before treatment**

- All furniture needs to be moved away from the walls 2-3 inches only during interior treatments
- All windows need to be closed for exterior treatments

### **General information**

Spiders tend to live alone. They are attracted to bugs as it gives them more food sources. Reducing the amount of insects around and in the house can help to reduce the amount of spiders around.
