

Voles

This is for the treatment of voles.

Possible chemical(s) to be used for treatment

- Resolv Soft Bait
- Contrac All-Weather Blox

Preparations before treatment

- Clear up as much clutter from the areas of concern for maximum visibility during inspection

General information

Voles can reproduce at a phenomenal rate. They can damage your yard quickly. They make tunnels and you tend to notice them the most early spring or late fall. They are active all year round and do not hibernate. They can cause yard damage or physical damage to your driveway or porch long term.
