

Flies

This is for the treatment of flies.

Possible chemical(s) to be used and time to stay out of the building

- Pro 110 ULV (4 hours)
- Dagnet FT EC (4 hours inside, 2 hours outside)

Preparations before treatment

- All furniture needs to be moved away from the walls 2-3 inches

General information

Flies tend to be more popular on acreages and farmhouses. Where there is one there are usually hundreds. They tend to lay eggs in attics and then infest the house.
